

Claims

- [c1] A towel for drying between the toes comprising an elongated tubular member having a length and two ends, said tubular member comprised of a fabric having a plush, absorbent outer surface, said elongate tubular member having a loop attached to at least one of said two ends.
- [c2] A towel as in claim 1 wherein said elongated tubular member has an interior hollow space coextensive with said length.
- [c3] A towel as in claim 2 wherein said interior hollow space houses a substantially nonextensible, flexible core coextensive with the length of said tubular member.
- [c4] A towel as in claim 3 wherein said core is fixably attached to both of said ends of said tubular member and to said loop.
